OE

In the beginning...

- First written account of the early history
 - *“The Ecclesiastical History of the English People,”*
by The Venerable Bede
 - Written in Latin ≈731; nearly 300 years after the events described therein
- “It Oere Linda Boek”?

OE

In the beginning...

- According to Bede
 - Forefathers of Anglo-Saxons came from three Germanic groups: (i) **the Saxons**, (ii), **the Angles** and (iii) **the Jutes**.
- New linguistic and archaeological evidence suggests two large revisions (Robinson, 1992)
 - If Jutes came at all, they did not come directly.
 - Frisians either came in large numbers or, being on the way, greatly influenced the language.

OE

In the beginning...

Archaeological evidence connects Isle of Wight (Jutes) with Ripuarian Franks of the middle Rhine

Norman (Old French) influence

- Results in ME
- French and Latin spoken by noble *men* for official purposes only
- Women and commoners spoke only English

Old French/Latin influence on English

- qu- pronounced as kw- instead of k-
 - cf., quit/quitter, question/question, quarter/quart
- ca- vs. cha-
 - carry/charrier, cauldron/chauldron, cattle/**chattle**
- -arie and -orie vs. -aire and -oire
 - victory/victoire, salary/saloire
- Norman kept “s” where Parisian did not
 - August/août, forest/forêt

French/Latin influence on English

- About 7500 words adopted from Norman French are still in use today.
- Henry IV (1399) first ruler since Norman Conquest to use English only.

ME Yogh ȝ ȝ

- In addition to þ and ð, we have yogh (ȝ).
- Generally used for OE “g” and “h”
 - “g” also used, but only for stop consonants as in “good.”
- ȝ used for “y” in ȝong (young)
- MnE “gh” as in niȝt (night)
 - “-gh” sounds still heard in Scots, (*licht* and *loch*).
- Sometimes “w” as in oȝen (own).

Example: Early ME

COSTARD: The matter is to me, sir, as concerning Jaquenetta. The manner of it is, I was taken with the manner.

BEROWNE: In what manner?

COSTARD: In manner and form following, sir, all those three. I was seen with her in the manor house, ...

Example: Shakespeare (Henry IV, I-ii)

FAL. Now, Hal, what time of day is it, lad?

PRINCE. Thou art so fat-witted with drinking of old sack, and unbuttoning thee after supper, and sleeping upon benches after noon, that thou hast forgotten to demand that truly which thou wouldest truly know.

Wine-whine merger

wine/whine, wet/whet, weather/whether, wail/whale, Wales/whales, wear/where, witch/which

“Whole” spelled with “wh” came late in English, but the word is one of a few English words remaining very close to its IE origin.

More on *ge-* words

Most germanic languages have lots of words beginning with *ge-*, why not MnE?

- OE riddled with *ge-* words.
- In some OE nouns, *ge-* signifies “together.”
 - *geferscipe* (s.m. fellowship, community)
 - *gefera* (w.m. companion)
 - *gebrothru* (m.pl. brothers).
- In verbs, often has a perfective sense:
 - *geascian* (find out)
 - *gewinnan* (get by fighting, win), cf. Fris. *gewin* (gain)
 - often used with past ptcs.

More on *ge-* words

- Stress is placed on the first syllable, but *ge-* is never stressed in OE.
- ME *ge-* \longrightarrow *i-* (*y-*) as in
 - “*Now for the ground which; which, I mean, I walked upon: it is y-cleped thy park.*”
 - W. Shakespeare, LL I-i.
 - MnE S. Appalachian dialect \longrightarrow *a-*
 - “You were a-scared of that place?”

They had enough, though.

MnE *th, ch, gh* and *sh*

- Þ became the dominate letter over ð early in ME
- Þ often confused in ME with “Y”
 - Whence, “Ye Olde Tea Shoppe.”
- ➡ “th” replaced þ in late ME,
- ➡ “gh” replaced ȝ
- ➡ “ch” and “sh”
